Houston, TX 75202**Re: Capping the San Jacinto River Waste Pits Is The Best Option For League City**

Dear Mr. Miller:

I am familiar with the issues surrounding Superfund sites in Harris and Galveston Counties. I want to make my voice heard: We must protect all citizens downstream from the San Jacinto River Waste Pits. To protect us, the EPA needs to place a permanent cap on the waste pits, and you need to do it now.

The temporary cap has protected all of us since 2011 and has never leaked. We want to ensure this protection for future generations through a permanent cap. Please consider us and our health in your decision-making process.

Sincerely,

(b) (6)
